INTRODUCTION

Hello people. After some thinking, I've decided to start the topic of Data Analysis using Python. Here, we will try to learn data science from beginner level to an intermediate level. If time permits, I will continue this topic to expert level also. The list of topics will be as follows-

1. Installing Python and other necessary modules
2. Introduction to Data Science
3. Application of Data Science
4. Introduction to NumPy using Python
5. Introduction to Pandas using Python
6. Data Visualization using Matplotlib using Python

After the competition of these topics, we will learn some use of data science in our day to day life. We will solve those problems using data science. Stay tuned, happy learning.
